DIFFERENTIAL EQUATIONS SEMINAR

Wednesday, March 3
2:35 p.m. 330 Harrelson Hall

Mark Williams

Department of Mathematics
University of North Carolina at Chapel Hill

“Stability of multidimensional viscous shocks”

We discuss some of the common features in recent work on questions of long-time stability and the small viscosity limit for multidimensional shocks.

Graduate students are invited to attend.

For questions, comments, and offers to talk, contact Steve Schecter, schecter@math.ncsu.edu.
